9. Resolution Authorizing the City Manager to Enter into a Contract for Sanitary Sewer Replacement at West Pine Street between Magnolia Boulevard and Laurelton Boulevard with the Lowest Responsible Bidder.

The following Resolution was moved by  
and seconded by :

Resolution Declaring Temporary Moratorium on  
on the Establishment of Battery Energy Storage  
Systems in the City of Long Beach.

WHEREAS, the City Council of the City of Long Beach finds that it is in the best interest of the City of Long Beach and its residents to impose a one (1) year moratorium on the establishment of Battery Energy Storage Systems (“BESS”) in the City of Long Beach. BESS, defined as a facility, structure, building, or parcel of land that holds or houses electrochemical devices that charge, or collect energy from, a power grid and are then discharged to provide energy to parcels, structures, facilities, dwellings, or utilities serviced by that grid, with the exception of residential solar panel battery storage, offer a role in reducing demand and costs associated with grid infrastructure operation and expansion, by storing energy from the grid during off peak hours and redistributing energy back during peak demand. The deployment of BESS can potentially reduce the need of costly expansions of the grid by utility companies, and deters the use of fossil fuels during times when energy use is highest; and

WHEREAS, there has been a significant amount of public concern regarding the volatile nature of lithium ion batteries, and the potential threat to the health and safety of the communities surrounding these facilities, including reports of fires at these facilities throughout the State of New York over recent years, raising concerns about the impact to the environment, as well as the stress put on roadways and infrastructure in the event an evacuation is necessary; and

WHEREAS, these concerns, coupled with the City of Long Beach’s need for additional information and assurance about the safety of these types of facilities, including but not limited to ensuring the Long Beach Fire Department will be able to suppress a fire should one occur, the availability of built-in fire suppression and/or other safety measures, precautions related to gas emissions and deterring any necessary fire suppression chemicals from impacting groundwater, possible decommission plans, and the adequacy of location and other special exception standards for siting these facilities, has caused the City Council to consider the enactment of a one (1) year limited and temporary moratorium for the review of permitting of BESS pursuant to City Zoning Code, while these issues are further considered and the law is adequately revised to address any outstanding concerns, including the potential for catastrophic failures and evacuation planning; and

WHEREAS, the City Council wishes to study these problems, and finds that to ensure the public health, safety and welfare, a thorough examination of the risks of these facilities must be ascertained prior to the submission of any applications requesting approval for this use. The City Council finds it imperative to undertake a thorough examination of these systems to identify any possible threats to public health, safety and welfare as well as evaluate the potential for environmental degradation, and may propose legislation or other actions to address these problems in the City;

NOW, THEREFORE, be it

RESOLVED, by the City Council of the City of Long Beach, New York, that no BESS shall be established in the City of Long Beach, and no application shall be made before any board, commission, body or entity of the City of Long Beach, nor shall any outstanding application made before any board, commission, body, department or entity of the City of Long Beach be accepted, granted or otherwise acted upon related to the establishment of a BESS, for a period of one (1) year from and after the adoption of this Resolution, unless this Council shall rescind, terminate, amend, continue or extend the temporary moratorium, herein before adopted and decreed prior to the expiration of said period of temporary moratorium; and be it further

RESOLVED, that the City Council, as Lead Agency for the City of Long Beach, hereby adopts this Resolution and determines that the aforementioned temporary moratorium for the establishment of a BESS constitutes a Type II action pursuant to SEQRA and the City of Long Beach Environmental Quality Review Act and therefore requires no further review in accordance with SEQRA 6 NYCRR § 617.5.

April 15, 2025

Item No. 2  
Resolution No.

The following Resolution was moved by  
and seconded by :
